Have had the same under consideration, and I am instructed to report the same back to the Senate with the recommendation that it do not pass.

ATLEE, Chairman.

Committee Room, Austin, Texas, Feb. 6, 1899.

Hon. Jas. N. Browning, President of the Senate.

SIR: Your Committee on State Asylums, to whom was referred

House bill No. 22, being a bill to be entitled "An Act to provide for the location and building of a branch asylum for the care and treatment of the epileptic insane of the State; and to make an appropriation therefor,"

Have had the same under consideration, and I am instructed to report the same back to the Senate with the recommendation that it do pass.

MORRISS, Chairman.

Committee Room, Austin, Texas, Feb. 2, 1899.

Hon. Jas. N. Browning, President of the Senate.

SIR: Your Committee on Engrossed Bills have carefully examined and compared

Senate bill No. 43, being "An Act to appropriate \$75,000.00 to build and maintain a cotton or woolen manufactory or both within the walls of the Rusk Penitentiary and to buy necessary machinery therefor,"

And find the same correctly engrossed.

JAMES, Chairman.

HOUSE MESSAGE.

Hall of the House of Representatives, Austin, Texas, Feb. 6, 1899.

Hon. Jas. N. Browning, President of the Senate.

I am directed by the House to inform the Senate of the passage of the following bills:

House bill No. 22, "An Act to provide for the location and building of a branch asylum for the care and treatment of the epileptic insane of the State and to make an appropriation therefor," with amendment.

Also House bill No. 293, "An Act to make appropriation to make a proper defense of the ten suits now pending in the United States Circuit Court for the Western District of Texas, known as the 'injunction suits against the Railroad Commission of Texas,'" with amendments.

Also that the House has concurred in Senate amendments to House bill No. 118.

Respectfully,
LEE J. ROUNTREE,
Chief Clerk House of Representatives.

IN SENATE.

The above House bills were referred as

House bill No. 22 to Committee on State Asylums.

House bill No. 293 to Committee on Finance.

SPECIAL COMMITTEE.

The Chair announced the following special committee to visit the several asylums, as required by the resolution of Senator Morriss, adopted on February 1: Senators Morriss, Johnson and James.

BILLS AND RESOLUTIONS.

By Senator Wayland:

Senate bill No. 114, A bill to be entitled "An Act to amend Articles 3862, 3863 and 3866, Revised Civil Statutes, relating to the government of the Agricultural and Mechanical College of Texas."

Read first time, and referred to Committee on Agricultural Affairs.

By Senator Lloyd:

Senate bill No. 115, A bill to be entitled "An Act to create the office of State Purchasing Agent, to define his duties and fixing his compensation therefor."

Read first time, and referred to Committee on Finance.

By Senator Davidson:

Senate bill No. 116, A bill to be entitled "An Act to amend Articles 529, 529e, 5291, Chapter 5, Title XIII, of the Revised Penal Code of the State of Texas of 1895, and adding thereto Articles 529g and 529s, and repealing subdivision 18 of Article 529g, of Chapter 98, of the general laws of the State of Texas of 1897, relating to the offenses for the protection of fish, birds and game, and repeal all laws in conflict herewith.

Read first time, and referred to Judiciary Committee No. 2.

By Senator Davidson:

Senate bill No. 117, A bill to be entitled "An Act to amend Section 1069 and Sections 2 and 3, of the Acts of the Special Session of the Twenty-fifth Legislature, approved June 19, 1897, and to provide for the compensation and mode of payment of special judges appointed or selected thereunder, and to provide for the trial of cases by such special judge.

Read first time, and referred to Committee on Judicial Districts.

By Senator Yantis:

Senate bill No. 118, A bill to be entitled "An Act to prohibit the officer, agent or representative of any railroad corporation from giving free transportation over the lines of such railroad to any person other than the agents, representatives or | ciary Committee No. 1.

employes or attorneys of such railroad, and to fix a penalty for the violation of the provisions of this act."

Read first time, and referred to Judi-

ciary Committee No. 2.

By Senator Odell:

Senate bill No. 119, A bill to be entitled "An Act to amend Article 4368, Chapter 3, Title XCIV, of the Revised Civil Statutes of the State of Texas, prescribing the duties of railroad companies with respect to their general and public offices, and the residence of their officers, to be kept and maintained within this State."

Read first time, and referred to Committee on Internal Improvements.

By Senator Odell:

Senate bill No. 120, A bill to be entitled "An Act to amend subdivision 35, of Article 5049, Chapter 1, Title CIV of the Revised Statutes, relating to general occupation taxes.'

Read first time, and referred to Com-

mittee on Finance.

By Senator McGee:

Senate bill No. 121, A bill to be entitled "An Act to amend Article 41, of Chapter 3, Title I, of the Penal Code of the State of Texas, relating to the defense of intoxication or temporary insanity of the mind produced by the voluntary recent use of ardent spirits, cocaine, morphine, or any other drug or poisonous compound, and providing that intoxication or temporary insanity produced by voluntary recent use of ardent spirits, cocaine, morphine or other drug or poisonous compound shall not constitute an excuse in this State for the commission of crime, and providing that evidence of temporary insanity or intoxication produced by such use of ardent spirits, cocaine, morphine or other drug or poisonous compound may be introduced by the defendant in any criminal prosecution in mitigation of the penalty attached to the offense for which he is being tried, and directing the judges in district and county courts to charge the jury in proper cases in accordance with the provisions of this law."

Read first time, and referred to Judiciary Committee No. 2.

By Senator Burns:

Senate bill No. 122, A bill to be entitled "An Act to provide for the redemption of land sold for taxes due an incorporated city or town, and providing that redemption of the land so sold may be had within two years from date of sale, and providing the terms, conditions and penalties incident thereto."

Read first time, and referred to Judi-

By Senator Atlee:

Senate bill No. 123, A bill to be entitled "An Act to amend Articles 4936 and 4937, of the Revised Civil Statutes of the State of Texas, so as to afford more adequate protection to persons and stockraisers in the stock-raising part of this State in all counties not expressly expressly exempted from the operation of this law."

Read and referred to Committee on Stock and Stock-raising.

Call concluded.

SPECIAL ORDER.

The Chair laid before the Senate, Senate bill No. 30, A bill to be entitled "An Act to define libel and privileged communications and publications, and to more effectually secure the liberty of the press, and to prevent abuses in exercising such liberty of the press," action being on engrossment.

By Senator Dibrell:

"Amend in lines 16 and 17 of Section 2 by striking out the words, 'with good motives' and substituting in lieu thereof the following words, 'in good faith.'"

At this point, upon request of Senator Greer, the bill as amended was read in fuli.

By Senator Atlee:

"Štrike out in line 11 page 1, the words 'signs or other representation.'"

Lost.

(Senator Terrell in the chair.)

By Senator Yantis:

"Amend by striking out on page 2, in lines 23 and 24, the following words, 'the general character of the plaintiff."

By Senator Greer:

Substitute the amendment (Yantis') as follows:

"Amend the bill, page 2, line 24, by adding after the word 'plaintiff' the following, on the subject of the alleged libel.' Also strike out the word 'character,' line 24, page 2, and insert in lieu thereof the word 'reputation.'

Adopted by the following vote:

Yeas-16.

Atlee. McGee. Burns. Morriss. Dibrell. Neal. Greer. Odell. Grinnan. Sebastian. Johnson. Stafford. Kerr. urney. Linn. Wayland.

Nays—5.

Davidson. Terrell. James. Yantis. Ross.

Absent.

Lloyd. Potter. Stone.

Absent-Excused.

Goss. Gough. Hanger. Lewis.

Miller. Patterson.

Yett.

(Lieutenant-Governor Browning in the chair.)

The amendment as substituted was then adopted.

By Senator Johnson:

"Amend the bill, on page 2, line 21, after the word 'least' by striking out the word 'five' and inserting in lieu thereof 'ten.'

Adopted.

By Senator Turney:

"Amend by striking out the word 'actual,' in line 23, page 1."

Adopted.

By Senator McGee:

"Amend by striking out the word 'not,' in line 19, page 1, and by striking out the words 'but shall be proven like any other fact,' line 20, page 1.

By Senator Atlee:

Substitute the amendment,

Insert after word "publication," in line 20, page 1, the word "alone."

Pending action, on motion of Senator McGee further consideration was postponed, and the bill made special order for day after tomorrow (Wednesday) after call.

PENDING BUSINESS.

The Chair laid before the Senate, pend-

ing business, being

Senate bill No. 20, A bill to be entitled "An Act to set apart and appropriate to the permanent school fund of the State of Texas all of the lands heretofore or hereafter recovered from railway companies or other persons, firms or corporations, and to provide for the disposition of the same," action being on Senator Grinnan's amendment, to-wit:

"Amend Section 1 by adding, 'if it should hereafter develop that the State is indebted to the general school fund for land appropriated or sold by it, this is construed as a transfer in part pay-

ment thereof.'

The amendment was,

Adopted.

Bill as amended ordered engrossed.

On motion of Senator Sebastian, the regular order of business was suspended to take up on second reading,

House bill No. 22, A bill to be entitled "An Act to provide for the location and Atlee.

building of a branch asylum for the care and treatment of the epileptic insane of the State, and to make an appropriation therefor.

By Senator McGee:

"Amend by adding after the word 'convict,' line 16, page 6, Section 11, the words, 'but such convict shall be compelled to serve out the full term required at the rate of 50 cents per day for service."

Adopted.

By Senator Burns:

"Amend by striking out the enacting clause."

Pending action, on motion of Senator Atlee further action was postponed, and the bill made special order for Thursday next after morning call.

The Chair laid before the Senate on

second reading,

Senate bill No. 3, A bill to be entitled "An Act to provide for the sale of real estate under mortgage, deed of trust, or other lien, and to provide for the sale of land under execution, and for the appraisement of land sold under mortgage, deed of trust, execution or other lien, and to provide for the right of redemption of real estate within two years from date of sale when sold under execution, mortgage, deed of trust or other lien: and to repeal all laws in conflict herewith."

Bill read second time.

Pending action on engrossment the following executive message was received:

EXECUTIVE MESSAGE.

EXECUTIVE OFFICE, STATE OF TEXAS,

Austin, February 6, 1899.

To the Honorable, the Senate:

I ask your advice and consent to the following appointments:

FOR PENITENTIARY BOARD.

William Clemens of Comal county. John B. Peyton of Trinity county. S. M. Fry of Tarrant county.

REGENTS OF THE UNIVERSITY.

Thomas D. Wooten of Travis county. T. W. Gregory of Travis county.

Respectfully,

JOSEPH D. SAYERS, Governor.

To the Senate and House of Representa-

the eighth annual report of the Regents of the University of Texas.

JOSEPH D. SAYERS, Governor.

EIGHTH ANNUAL REPORT OF THE REGENTS OF THE UNIVER-SITY OF TEXAS.

AUSTIN, TEXAS, January, 1899. To His Excellency, Joseph D. Sayers, Governor of Texas.

The Board of Regents have the honor to submit the following report of the University of Texas for the years 1897 and 1898.

GROWTH OF THE UNIVERSITY.

The growth of the University during this period has been very gratifying. The number of students in 1897 was 751, and in 1898 800, being a gain of 191 over the enrollment of the two preceding years. This gain was made in the face of increased requirements for entrance and for graduation, and notwithstanding the unfavorable influence in fever epidemics and financial depression. (A detailed statement of the student enroli-ment is given in "Exhibit A.")

The area of student patronage has also been increased, until it now includes one foreign country (Mexico), seven States, and one hundred counties in Texas. The popularity of the University and its adaptation to the needs of our people is evident from the fact that its patronage represents forty-five different trades, occupations and professions. Over onefourth of its patrons are farmers, who equal in number the lawyers, merchants, physicians and ministers combined.

Nearly half the students in the University pay their own expenses, either by money which they have previously earned, or by labor while they are pursuing their studies. It should be among the foremost duties of the State to aid this class of students and increase their number by furnishing board and lodging at cost and multiplying facilities for self-support. The educational advantages of the University should be made accessible to the largest possible number of the youth of the State, and especially to those who through financial inability This can are least able to secure them. be done only by reducing to the lowest point the cost of living, to which end there is need of additional dormitory and mess hall accommodations.

While the University has grown rapidly in the extent and area of its patronage during the past two years, and while the attendance in the Academic Depart-I have the honor to herewith transmit | ment is already twenty-five per cent.

larger than last year, there has been still more gratifying advance in the standards of scholarship. The requirements for admission have been raised to as high a point as seems compatible with the present condition of our secondary schools; and the requirements for graduation have been strengthened by specific additions and by proper subordination and correlation of studies. Certain fundamental studies essential to mental culture, and certain informational studies essential to good citizenship have been prescribed in all courses leading to degrees. With these restrictions, and subject to approval by the faculty, students are permitted in the later years of their courses to select their studies with reference to their aims in life, and their individual tastes and talents. In short the University is steadily elevating its standards of scholarship and guarding its degrees, with due regard to the condition of our public schools and the necessities of our people. (For detailed statement of the courses of instruction offered in the University and for the requirements for admission and for graduation, see "Exhibit B.")

Advanced work has been carried on in the University in several lines of study; but lack of teachers, of apparatus, and of books has prevented desirable growth in this direction. Those of our graduates who seek advanced work and training have as a rule been forced to go to larger and better equipped institutions elsewhere, like Harvard, Columbia, Cornell, and the University of Chicago. During the past two years fellowships and scholarships, representing eight different lines of study and aggregating in value several thousand dollars, have been bestowed upon graduates of this institution by universities in other States. is natural that many who thus leave the State, never return, and thereby Texas is deprived of a class of workers that she Our own University especially needs. should be better equipped for advanced instruction with teachers, apparatus, and books, and our graduates should be en-couraged and aided by means of scholarships and fellowships to receive higher training and carry on advanced work in Texas. Scores of ambitious and zealous students seeking advanced training and opportunity for original investigation, would welcome adequate equipment for this purpose in our own University, and by patient, intelligent and unselfish study of the problems affecting the life and welfare of our people, would in after years make ample return for the small expense incurred in their training.

teaching force of the University during the past two years, mainly in the line of additional instructors for the lower classes, whereby large classes have been divided into small sections and more efficient instruction has been given; but, excepting in Pedagogy and Botany, new lines of instruction have not been added. There is need of additional teachers in several lines, and it is earnestly hoped that funds necessary to their employment may be supplied by the present Legislature. (For list of Faculty, officers, and employes of the University, with duties and salaries, see "Exhibit C.")

The increased efficiency of the University Library deserves especial notice. Since the last report, the library has been moved into a larger room and put in charge of a trained librarian. The number of books drawn by students the first year after its removal was more than twice as great as the year before, and this year there is a further increase in its use of twenty-five per cent. The Library is the daily working laboratory of the University, essential to proper instruction in every subject. Provision should be made for its regular annual increase, and, as soon as possible, a fireproof building should be erected for its

permanent protection. A beginning has been made in collecting material relating to Texas history. The late Governor O. M. Roberts donated

to the University his entire collection of books and private papers, and the Texas Veteran's Association has also donated A fire-proof its historical collection. vault is soon to be constructed for the temporary preservation of this and other

similar material, until such time as the University may be enabled to possess a

fire-proof building.

The University has accomplished a great deal during the past two years towards improving our public schools. By establishing a School of Pedagogy for the special training of teachers, by opening all its courses or instruction to teachers 21 years old, free from regulations governing candidates for degrees, by conducting summer schools for teachers who are unable to attend the regular sessions of the University, by systematic communication with the teachers through circular letters and private correspondence, and by sending members of its Faculty to visit, inspect, address, and affiliate the State high schools, the University has shown itself fully alive to its duty and its opportunity as the head of the public school system of Texas. But it is greatly hindered in this work by lack of funds. Additional equipment is There has been some increase in the needed for the School of Pedagogy and

additional teachers for the Summer Schools. The improvement of our public schools depends mainly upon a better supply of thoroughly educated, broad-minded teachers. This need is so great and so palpable that special provision should be made to supply it. If annual scholarships to the value of \$100 each were established in the University, one for each member of the Legislature, many worthy and aspiring youth, representing every portion of the State, would be drawn into the teachers profession and enabled to thoroughly equip themselves for their work by a full course of training in the University. In this way more would be accomplished towards improving our public schools than by much larger expenditures for lengthening the school terms.

The work of affiliating with the University the high schools and academies of the State has gone steadily forward. In regard to this work the President of the University says in his last annual report:

"I have devoted much time during the year to visiting the schools of the State and getting acquainted with the people. Seventy different schools have been visited, and sixty-four lectures, talks, and addresses have been delivered before schools, public audiences, conventions, and teachers' associations. This work is so great as to seem almost endless, but good results are clearly visible. I have been received everywhere with the most friendly cordiality and frequently with enthusiasm; and I feel confident that the people of our State, if fully informed of the work that the University is doing, will not only give it hearty and generous patronage, but in due time provide a fixed revenue sufficiently large for its maintenance and development.

(For list of Affiliated Schools see "Exhibit D.")

The completion of the East Wing of the Main Building furnishes the University long needed room for recitations, lectures, and laboratory work. All the space in the new wing, as well as all in the other buildings, has been assigned for occupation and use by the various schools of instruction. There will be required \$10,000 for properly furnishing, heating, and lighting the new wing.

NEEDS OF THE UNIVERSITY.

The greatest and most immediate need of the University is a building for women students and an enlargement of its present hall for men students. A building for women students is essential for

and their instruction; and it should be erected at once on the University campus with construction and equipment in accordance with recognized sanitary principles. Such a building under proper management, would be a safeguard of the health of the young ladies; and, by reducing the cost of board and lodging would bring the advantages of University education within reach of a very large number of girls of moderate means, who at present, by reason of the great expense, are unable to attend the institution. A woman's building would also furnish a place where, until better provision is made, the lady students in the University can be instructed in art and music, two subjects not now included in our courses of instruction, but universally considered essential in colleges. equipped for the complete education of women. The law requires that the University of Texas shall be open to both male and female on equal terms; but this is not now the case. In order to remove this reproach and do justice to the girls of Texas, the Board earnestly recommend the erection of a Woman's Building to cost \$50,000.00.

Second only to a building for women students is the need of additional lodging and boarding accommodations for men. Fortunately this need can be supplied at moderate expense. The building now used for the purpose can be enlarged and made to accomplish for the University today the same valuable service that it rendered the institution during its early struggle for existence. Donated to the University for the purpose of reducing the cost of student living, at a time when board and lodging could scarcely be obtained in Austin for less than \$20 per month this building has reduced the price to \$15, and made it possible for many students of moderate means to attend the University. Further reduction in the cost of living is now desirable, and it can be accomplished easily by an increase in our rooming and boarding accommoda-The present building suffices for only forty-two students—a number entirely too small to reduce the cost of living to its lowest limit. Plans and estimates by competent architects show that the building can be enlarged to accommodate 150 students by an outlay not exceeding \$20,000; and in this way living expenses can be reduced from \$15 per month to about \$10. Such reduction would operate to bring down prices elsewhere in the city, and thus the cost of education in the University would be diminished about thirty per cent. and brought within reach of fully twice as their health, their economical living, many students as are now enrolled. But

the beneficial influence of the University would be increased far beyond the point indicated by doubling the number of its students; for the boys and girls that would be attracted to it by reduced expenses would be peculiarly benefitted by its training and doubtless would in after years contribute in unusual degree to the development of Texas.

MANAGEMENT OF UNIVERSITY LANDS AND POLICY OF BUILDING UP THE UNIVERSITY.

It is gratifying to report an increase in the income from University lands since our last report. (A detailed report by Special Agent Tom J. Lee is given in "Exhibit F.") This increase has made possible the construction of the East Wing of the Main Building, at a total cost of \$38,462.50, and the repair of the foundations and walls of the Auditorium, which were in danger of falling. But for this timely addition to our resources we would not have been able to complete the Main Building, since the Constitution of the State forbids appropriations from the general revenue for University buildings. It is the evident intention of the Constitution, as well as a plain necessity, that the available University fund be applied, in part at least, to the permanent up-building and development of the institution. If not, the University might remain forever in its present undeveloped condition, failing to keep pace with the growth of the State and the constantly increasing demand of our people for higher education.

The Constitution did not contemplate an undeveloped and imperfect University; for it clearly commands otherwise. "The Legislature shall, as soon It says: as practicable, establish, organize and provide for the maintenance, support and direction of a University of the first class." To carry out this mandate by providing for the gradual up-building of the University the Board recommend that the income from land leases be devoted to the erection of buildings and other permanent improvements, at least until the pressing necessities of the University in this direction are supplied. The Board have followed this policy during the past two years, and thereby have completed the Main Building, according to the original designs, and have begun the work of gradually improving and beautifying the University campus. policy is desirable not only because it seems to afford the only means of supplying the University with necessary buildings, but also because the income from land leases being dependent upon seasons and upon the prosperity of the live stock

interests of the State, is quite variable from year to year and liable to material decrease. It cannot be relied upon therefore to meet the regular running expenses of the University. Up to 1896, owing to various causes, the receipts from land leases hardly exceeded sixty per cent. of what was due, and in some years they fell as low as forty per cent. On this point Land Agent Tom J. Lee says: "The income from land leases cannot be regarded as assured at any time, and it would certainly not be safe to make obligations and incur expenses upon the theory that the amount due from this source will be collected." Nor can it be expected that this income will be materially increased hereafter; for the lands available for leases are almost all now under lease. This income might, however, be applied to permanent improvements and thus the University would grow in years of prosperity without additional charge upon the State Treasury.

Too much emphasis cannot be laid upon the necessity of adopting a permanent policy which will assure not only the existence of the University, but also its continued growth and development. With the confidence inspired by this policy of steady development through revenue from fixed sources, private philanthropy with gifts and bequests would come to the aid of the State; and in a few years our people would enjoy the inestimable benefits of a "University of the first-class," as contemplated by its founders and the founders of Texas. With a feeling of deep gratification that the adoption of this policy has enabled them to add somewhat during the past two years to the up-building of the University and with the earnest hope that its continuance will be permitted by the granting of sufficient appropriations from the general revenue to meet running expenses, the Board present the following statement of receipts and expenditures for the past two years and estimate of appropriations needed for the next two years:

THE MEDICAL DEPARTMENT.

The attendance of students in the Medical Department last year was 259, and the year before was 288, being a gain of 40 over the two preceding years. During the present session there has been a

slight decrease; and further increase can not be expected, at least for some time, | I as the course of instruction has been lengthened from three years to four, and | I at the same time the requirements for admission have been materially in- I creased. Nor is increase in numbers specially desirable. The aim of the Department is rather to instruct thoroughly a smaller number, and thus provide for the State higher standards of medical training, knowledge and skill. Some legislation is needed to protect the people of the State against untrained and incompetent medical practitioners; and much would be accomplished in this direction if the requirements enforced by the State in the Medical Department were also enforced by local boards in granting license to practice medicine.

The prevalence of dengue fever, yellow fever, and the grippe in our State during the last two years emphasizes the necessity of thoroughly investigating these and other contagious diseases, with a view to treatment and prevention. To that end the Board desires to fit up in the Medical Department a bacteriological laboratory, and requests for this purpose an apppropriation of \$6,000. As the equipment of the various laboratories in the Medical Department has been greatly diminished in quantity and efficiency by long use and lack of resupply, the Board requests a slight appropriation for its replenishing. These items and the items of much needed demonstrators for several of the chairs are the only additions to the budget of last year, and they make up the increase asked for in the annual appropriations. (A list of the faculty and employes of the Medical Department with duties and salaries is given in "Exhibit E.")

The Medical Department has been greatly aided in many ways by the addition of University Hall, a handsome, commodious, and well furnished building, donated to the institution for the purpose of providing a dormitory for women students and a mess hall for students of both sexes, where board may be

supplied at cost.

The following is an estimate of the appropriation needed for the Medical Department for the years 1899-1900 and 1900-1901:

DEPARTMENT OF MEDICINE.	1. Requirements for Admission.	
School of Medicine.	Applicants for admission into the	De-
Third year	partment of Literature, Science and A must be not less than sixteen years	rts

age; into the Law Department not less than nineteen; into the Medical Department not less than seventeen. All applicants must furnish evidence of good moral character.

Graduates of affil-Examinations.iated high schools, of the Sam Houston Normal Institute, and of the Agricultural & Mechanical College are admitted to all departments of the University without entrance examinations. Persons holding First-grade State Teachers' Certificates are admitted upon passing an examination in General History. Students over twenty-one years of age, not wishing degrees and desiring to pursue only one or two subjects in the University are admitted to the Department of Literature, Science and Arts without examination upon satisfying the President and the professors concerned that they are qualified to take up the work desired. Examinations in English, History, and Mathematics are required of all other persons who desire to pursue courses in the Departments of Literature, Science and Arts, of Medicine, and of Engineering. For admission into the Law Department, an examination in English and American History may be substituted for that of General History, and an examination is also required in Latin. In lieu of the examination in Latin, an examination in French, German, or Spanish will be accepted. The scope and difficulty of these examinations may be seen from specimen papers published in the annual catalogue.

2. Requirements for Graduation.

Students in Law, in Medicine, and in Engineering must complete courses of study prescribed, there being no electives in these departments. In the Department of Literature, Science and Arts, the completion of twenty full courses is required for any degree. Four years is the time usually required for graduation. The work of the Freshman year is prescribed. In the Sophomore, Junior and Senior years a wide range of election, suited to individual tastes, talents, or necessities is permitted.

3. Courses of Instruction.

Department of Literature, Science and Arts.—This department offers instruction in the following subjects: Biology, including Physiology, Embryology, Zoology, and Histology, five courses; Botany, including two special courses in the study of the flora of Texas, four courses; Chemistry, organic and inorganic, with qualitative and quantitative analysis, including also industrial, physiological, and pharmaceutical Chemistry, eleven years, a graduate course, an undergradu-11—Senate

courses; English, including Rhetoric and Composition, English Literature, English Philology, Vocal Expression and Oratory, twelve courses; Geology, including Paleontology, Mineralogy, Petrography, eight courses; Greek, five courses; History, six courses; Latin, thirteen courses; Mathematics, ten courses; Applied Mathematics, three courses; Pedagogy, including Psychology and Ethics, History of Education, Philosophy of Education, and Child Study, eight courses; Philosophy, including Psychology, Logic, Ethics, and Metaphysics, six courses; Physics, including laboratory practice, seven courses; Political Science, including Political Economy and Constitutional Government and studies in Social Science, thirteen courses; French, seven courses; Spanish, five courses; German, seven courses. Graduate work in all the above schools is offered as far as the equipment and teaching force will permit.

Department of Engineering.—This department offers instruction preparatory to the profession of Civil Engineer. The instruction covers a period of four years and requires the completion of twenty full courses. It is given by means of lectures, recitations, laboratory and field work.

The following shows the course in detail:

Highway Engineering, First Year: Leveling, Contours and Grades, Freehand Lettering, Mechanical Drawing, Land Surveying, Adjustment and Use of Instruments, Compass Surveying, Freehand Drawing, Field Practice; Transit Surveying; Railway Curves; Topographical Drawing.

Second Year: Railroad Engineering; Turnouts and Track Problems; Linear Perspective; Field Practice; Mechanical Drawing; Geodetic, Hydrographic, Topographical, and City Surveying; Practice in Stadia Work and Triangulation; Freehand Drawing; General Mechanics; Use of Solar Compass.

Stresses in Roof and Third Year: Bridge Trusses; Field Practice; Mechanical Drawing; Mechanics of Minerals; Laboratory Work; Hydraulic Engineering; Designs of Simple Structures.
Fourth Year: Materials of Engineer-

ing; Theory of Arches; Foundations; Bridge Designing; Drawing; Stresses in the More Complex Structures; Masonry Construction; Memoirs; Sanitary Engineering; Class Thesis; Field

Department of Law.—This department offers four courses of instruction, as follows: An undergraduate course of two

ate evening course, and moot courts. Students completing the undergraduate course are entitled to practice law in the courts of the State without examination.

The course includes the following subjects:

Junior Year: Elementary Common Law, the Law of Contract, the Law of Sales, Criminal Law, Agency, Law of Torts, Pleading and Practice, Evidence and Political Science.

Senior Year: Equity, Corporations, Suretyship and Guaranty, Law of Partnership, Law of Real Estate, Insurance, Law of Commercial Paper, Constitutional Law, International Law.

Department of Medicine.

First Year: Systematic lectures upon (1) Anatomy; (2) General Biology; (3) Botany; (4) Physics and Inorganic Chemistry; (5) Materia Medica; (6) Elements of General Pathology and Aetiology, including Bacteriology and Hel-minthology; (7) Normal Histology; (8) General Embryology; (9) General Physiology and Physiology of Digestion and of the Blood.

Practical work in (1) Anatomy; (2) General Biology; (3) Botany; (4) Chemistry; (5) Normal Histology; (6) Embryology; (7) Physiological Chemistry and Demonstrations in Physiology.

Year: Systematic Second lectures upon (1) Anatomy; (2) Physiology of Metabolism, Circulation and Respiration, Excretion and Secretion, Muscular and Nervous Functions, Special Senses and Reproduction; (3) Organic and Medical Chemistry; (4) General Pathology; (5) Physical Diagnosis; (6) Physiology of Pregnancy and Normal Obstetrics; (7) Physiological Action of Drugs; Bandaging and Minor Surgery.

Practical work in (1) Anatomy; (2) Physiology; (3) Chemistry; (4) Pathological Histology; (5) Physical Diag-

Clinical lectures upon the Diagnosis of

Pregnancy.

Third Year: Systematic lectures upon (1) Surgical and Medical Anatomy, and special Embryology; (2) Practice of Medicine; (3) Practice of Surgery; (4) Pathology of Obstetrics and its Mechanics; (5) Therapeutics; (6) Special Pathology of the Blood and General Diseases, Blood-making Organs, Circulatory Organs and Respiratory Organs; (1) Mental and Nervous Diseases; (8) Hygiene; (9) Diseases of the Skin; (10) Diseases of Children; (11) Diseases of the Eye: (12) Diseases of the Ear, Nose, and Throat; (13) Chemistry of Bacterial Products.

Histology; (2) Clinical Technology; (3) Pharmacy.

Clinical lectures upon (1) General Surgery; (2) General Medicine; (3) Obstetrics; (4) Cases of Obstetrics.

Fourth Year: Systematic lectures in (1) Practice of Medicine; (2) Practice of Surgery; (3) Surgery of Obstetrics; Gynecology; (4) Special Pathology of Digestive Organs, genito-urinary organs, muscular apparatus, nervous system, skin and osseous system; (5) Mental and Nervous Diseases; (6) Diseases of the Skin; (7) Diseases of Children; (8) Diseases of the Eye; (9) Diseases of the Ear, Nose, and Throat; (10) Medical Jurisprudence; (11) Climatology; (12) Dietetics.

Practical work in (1) Operative Surgery; (2) Gross Morbid Anatomy and Autopsy Making; (3) Bacteriology.

Clinical lectures on Medicine, Surgery, Gynecology, Mental and Nervous Diseases, Diseases of the Skin, Diseases of Children, Diseases of the Eye, Diseases of the Ear, Nose, and Throat.

EXHIBIT F.

REPORT OF LAND AGENT.

Waco, Texas, November 20, 1898. Messrs. Geo. W. Brackenridge, Wm. L. Prather and T. S. Henderson, Committee on Lands.

DEAR SIRS: I beg to acknowledge receipt of your favor of the 15th inst. directing me to prepare, for the use of the Land Committee and the Board of Regents, a full and complete statement of the management of the University lands since the same have been under the control of the Board of Regents by virtue of the Act of the Legislature of 1895, and directing me particularly to embody in this statement the following viz.: (1)

Status of the lands and the leases thereon, with the income therefrom at the time that the Board of Regents was invested with the management and control thereof; (2) Present status of land leases, and the annual income therefrom, showing the number of contracts now in effect with the names of the lessees, the date, price per acre realized and the term of each lease, with the quantity and the location of the land covered thereby; (3) Moneys collected from sales and under leases, including voluntary payments by lessees, amounts collected by suit and by adjustments with parties unlawfully occupying and enclosing University lands;
(4) Present status of accounts for sale of University land, with amount of principal remaining unpaid on land notes and the interest annually due thereon, showing the attitude of each account whether in good standing or delinquent, and including forfeitures taken and sales made by the Board of Regents since the Act of 1895 went into effect; (5) Concessions granted as inducements to the making of lease contracts; (6) Estimate as to the probable income that will in the future be received annually from leases; (7) Expenses that have been incurred in the management of the University lands by the Board of Regents, including salary of land agent, traveling expenses and surveyors' fees.

In obedience thereto, I beg to respectfully submit the following statement:

When the Act of 1895 investing the Board of Regents with the management and control of University lands went into effect, which was in the month of August of that year, there were in existence fifty-one lease contracts made by the Commissioner of the General Land Office, that were in good standing, and these covered 288,780 acres of land, yielding an annual income to the University of \$8,663.40; and twenty-three lease contracts that were delinquent and subject to cancellation, and these covered 54,560 acres of land, the accrued payments thereon amounting to \$2,767.20. The following were the contracts that were in good standing at that time, viz.:

	Total		\$2767 20	54,560

Acting under the direction of the Land Committee, on the 27th day of May, 1896, I requested the Commissioner of the General Land Office to declare all the above contracts of lease cancelled, which he did. As shown by the above statement, the accrued payments under these contracts amount to \$2,767.20. This amount can probably be collected by suit against these parties, if such a course be deemed advisable. Except in one or two instances, these lessees are still in the State, and perfectly responsible.

With regard to the contracts of lease made by the Commissioner of the General Land Office, that were in effect in August, 1895, as stated above, some have expired, others have from time to time become delinquent and been cancelled by the Commissioner at my request, and others have been cancelled by agreement with the lessee, the parties releasing the land covered thereby under new contracts. The following statement will show the disposition of each of these contracts:

```
No. 3301, cancelled and released in contract No. 27, October 29, 1896.
No. 3674, cancelled and released in contract No. 15, October 29, 1896.
No. 4382, cancelled and released in contract No. 16, October 29, 1896.
No. 9047, cancelled and released in contract No. 5, August 22, 1896. No. 8200, assumed by W. T. Hazlewood as assignee of Nolen Bros.
No. 9139, cancelled and released in contract No. 20, December 15, 1896.
No. 9211, cancelled and released in contract No. 6, August 22, 1896.
No. 9496, concelled for failure to make payment, July 12, 1897.
No. 9485, cancelled and released in contract No. 13, August 22, 1896.
No. 8777, cancelled and released in contract No. 5, August 22, 1896.
No. 8872, cancelled and released in contract No. 14, August 22, 1896. No. 8430, cancelled and released in contract No. 5, August 22, 1896. No. 7202, cancelled and released in contract No. 52, July 1, 1897.
No. 7620, cancelled and released in contract No. 5, August 22, 1896.
No. 7749, cancelled and released in contract No. 5, August 22, 1896.
No. 8466, cancelled and released in contract No. 42, July 15, 1897.
No. 4328, cancelled and released in contract No. 42, July 15, 1897.
No. 5748, cancelled and released in contract No. 5, August 22, 1896.
No. 5990, cancelled and released in contract No. 5, August 22, 1896.
No. 7074, cancelled and released in contract No. 14, August 22, 1896.
No. 8595, cancelled for failure to make payment, July 14, 1897.
No. 7156, cancelled and released under contract No. 39, July 7, 1897.
No. 8564, cancelled and released under contract No. 39, July 7, 1897.
No. 5923, expired and released under contract No. 40, June 23, 1897.
No. 7103, expired.
No. 7105, cancelled and released under contract No. 40, June 23, 1897.
No. 9119, cancelled and released under contract No. 4, August 22, 1896.

No. 3683 320	9 60
No. 9345	76 80
72,320	\$2,169 60

The annual income to the University from leases in August, 1895, when the Act of the Legislature investing the Board with the management and control of the University lands went into effect, amounted to \$8,603.40, as shown by the statement of leases in good standing, but in this list is included lease No. 3452, to M. Halff & Bro., which by its term expired August, 1895. So that strictly speaking the receipts for the following the Board of Regents made the three folyear would not have been so large as is lowing contracts of lease, viz.:

shown by this statement. However, at the expiration of this contract Messrs, M. Halff & Bro. re-leased the land covered thereby under a contract made by the Board of Regents, as will be shown hereafter.

(2) Leases made by the Board of Regents.

Prior to my employment as land agent,

All of the above 78 contracts of lease are not now in effect. Some have expired by their terms, some have been cancelled by agreement, and some have been cancellations, viz.:

assumed by other parties, with the consent of the Board. I give below statement of these expirations, changes and cancellations, viz.:

No. 1, cancelled into No. 68 October 1, 1897, by agreement.

No. 9, cancelled into No. 52 July 1, 1897, by agreement.

No. 10, expired by limitation August 22, 1897, re-leased in No. 47 September 11, 1897.

No. 15, assumed by Elliot and Son & Purcell October 26, 1897.

No. 16, assumed by W. E. Connell October 26, 1897.

No. 18, cancelled into No. 68 by agreement October 1, 1897.

No. 24, assumed by Edward & Cochran March 3, 1898.

No. 28, expired by limitation December 1, 1897, land re-leased in No. 62 December 1, 1897.

No. 31, cancelled into No. 67 by agreement January 2, 1898.

No. 33, assumed by W. T. Hazlewood.

No. 37, cancelled into No. 52 by agreement July 1, 1897.

No. 40, assumed by Shipton Park.

No. 45, cancelled into No. 68 October 1, 1897, by agreement.

It is expressly provided in the lease contract that it shall not be transferable, nor the leasehold granted thereby assignable, except by the written consent of the Board of Regents. In those instances, as shown by the above statement, where the original lessee has been relieved from further liability and the contract assumed by a third party, a written agreement to that effect has been entered into between the Board and all parties concerned covering the transaction, and the same has been filed in the Land Office, with the original contract of lease. The Treasurer has also been notified that a particular contract nas been assigned, with the consent of the Board, and requested to note the name of the assignee upon the account originally opened for that contract of lease. In the case of cancellations by agreement, as set out in the above statement. the new contract in each instance sets forth the whole transaction, and is, of course, on file in the General Land Office. With regard to Nos. 10 and 28, which have expired by limitation, these contracts were made for the term of one year only for the reason that these par-

ties whom I found occupying and using University land were unwilling or unable to lease a quantity of land commensurate with the number of stock that they were grazing and unless they did so I would not agree that they should have leases for a terms of ten years upon any of the land, which they could, and perhaps would have taken advantage of to protect them from further depredations; hence in order to avoid the annovance and expense of an action to dispossess them, it was agreed that they should have a lease for the term of one year, with the understanding that before the expiration of that period they would either transfer their improvements to other parties, make a lease commensurate with the number of their stock, or else vacate the land. In both instances this proved to be the easiest solution of the difficulty, for as soon as contracts Nos. 10 and 28 expired the land covered thereby was promptly leased, together with adjoining lands, for a term of ten years.

The following is a list of the leases made by the Board of Regents since February, 1896, that are now in effect, with the lands covered thereby and amounts annually received therefrom:

In addition to the above, one other contract, No. 79, has been entered into, but not yet reported. This lease is with E. W. McKenzie, and covers 14,080 acres in Pecos county, the annual payment thereunder being \$422.40. This contract will bear date October 10th, but has not cation.

yet been executed for the reason that Mr. McKenzie is absent from the State. However, upon his return the matter will be promptly closed, and I now hold his deposit of \$2.00 per section as a guarantee that he will comply with his application.

SUMMARY.

acreage at present leased and the amount The following summary shows the annually received therefrom:

	Number of Acres,	Annual Payment.
Leases made by the Land Office prior to August, 1895 (still in effect). Leases made by the Board prior to February, 1896 Leases made by the Board since February, 1896 Under lease No. 79	72,320 70,400 1,261,832 14,080	2,083 20 36,454 26
Less, counted twice	1,418,632 24,000	\$ 41,129 46 720 00
Net		\$ 40,409 46

The increase in the annual revenue to the University since August, 1895, from land leases, is \$31,746.06. The increase in the acreage leased is 1,095,852 acres. An examination of the statements as to University land leases, made from time to time to the Board of Regents by the State Treasurer, which I find in the biennial reports of the Board to the Legislature, discloses the fact that there is at present a much greater acreage under lease than ever before since the inception of the lease system. The greatest number of acres that has heretofore at any time been leased was 685,280, which was in the year 1892. But the amount received by the institution from that source during that year was only \$15,627.70, and 147,690 acres must have therefore been delinquent, leaving 537,590 acres covered by contracts in good standing, or 847,042 acres less than at present.

In obedience to the instructions of the committee, in all contracts made since February, 1896, the annual payments become due either upon the first day of January or the first day of July of each year, and of the sum of \$36,454.26, which is the amount that should be received annually from these contracts, \$22,137.46 is due January 1st, and \$14,316.80 July 1st of each year. The annual payments under the contracts of lease made by the Commissioner of the General Land Office prior to August, 1895, which are still in effect, and under two of the contracts made by the Board during the period from August, 1895, to February, 1896, also still in effect, become due on the date of the respective lease. In several of the larger contracts, viz., Nos. 5, 15, 16, 39, and 68, the payments are made semi-annually on the first days of January and July. This arrangement was made as a concession to the lessees in view of the great acreage covered by each of these contracts and the amount of the payment.

UNLEASED LANDS.

All the western lands of the University that are located in counties east of the Pecos river are now under lease except the following tracts:

Block 12, Andrews county, containing 36 sections.

Part of Block 13, Andrews county, containing 26 sections.

Block 35, Ector county, containing 14 sections.

Part of Block 19, Loving county, containing 22 sections.

Total, 118 sections, or 75,520 acres. The reason that the above lands are not now the subject of lease is because they all seem to be wholly barren of water. Adopting a plan similar to the one prescribed in Section 4218t of the Revised Statutes in the case of public school lands "on which no permanent water supply exists," I have arranged with several parties to prospect for water on these lands and attempt to develop same by drilling, but in each instance without success. Three different parties have tried to obtain water upon the unleased land in Andrews county, and one concern went to considerable expense, sinking as many as eight or ten wells, all of which proved to be dry. The lands are good grass lands and desirable for ranch purposes, and but for the conditions with regard to water could be readily leased.

The following are the unleased lands of the University that are situated in counties west of the Pecos river, viz.:

Blocks 27 and 28, Pecos county, containing 41 sections.

Blocks 22 to 26, Pecos county, containing 125 sections.

Blocks A to N, El Paso county, containing 718 sections.

Block 46, El Paso county, containing 48 sections.

Total, 932 sections, or 596,480 acres. With regard to that portion of this land which is situated in Pecos county, I believe that, if present conditions continue, it will all be covered within 60 or 90 days. It has only been within the last six months that lands in this county were at all sought after, but in this period five (5) leases of University land in that county have been made, and two other applications are now on file.

With regard to the land in El Paso county, the portion that is at present unleased has never been the subject of lease, so far as I have been able to discover from the records of the Land Office. and the prospect of effecting leases thereon soon is not at all good. While the land seems to be fairly good grazing land, it is entirely without water supply, and I find that the general opinion, among those acquainted with that sec- lands.

tion of the country, is that it is absolutely barren, so far as water is concerned. It is quite certain that the lease price will have to be reduced if these lands are ever made to bear any revenue. The risk in attempting to secure water by drilling is very great, and if water can be secured in that way, the expense of putting in and equipping the wells will be very heavy in that section, and concessions in the lease price will have to be made in order to induce parties to assume this risk and expense.

I do not include herein the University lands situated in El Paso county on the Rio Grande river about thirty miles below the town of El Paso, and commonly known and spoken of as the San Elizario

SUMMARY.

Unleased lands east of the Pecos, 118 sections, or	8,880 acres. 6,480 acres.
Total	5,360 acres.
I have on file two applications to lease, one covering 26 sections in Andrews county, and the other 37 sections in Pecos county, which applications will be submitted to the committee at its next meeting. If these be accepted to a creage will be reduced to 61 During the years 1896, 189 the following amounts have into the treasury:	5,040. From leases. 7 and 1898
1896	\$ 9,377 48 32,861 27 36,169 30 \$78,408 05

I do not include in these amounts received from leases between the time that the Act of 1895 went into effect, being some time in August of that year, and January 1, 1896, for the reason that I have no data upon which the amount received in that period can be arrived at.

In addition to the above, certain amounts have been collected for use in occupancy of University land without lease, and also paid into the treasury. These collections were made from parties who were found in possession of the land, having the same enclosed and the exclusive use and benefit thereof, but

of 1897, their liability for such use and occupancy of the land could not be questioned, and the course to be pursued in recovering therefor is set out in the statute. But in most instances the parties preferred to adjust the claim for past use without suit, and take a lease upon the land enclosed and used by them. By direction of your committee, to such parties as preferred to settle a fair compromise was offered; and each settlement of this character was reported as it was made, and upon its being confirmed and ratified the money so collected was turned over to the State Treasurer and his receipt taken therefor. The amounts with no lease thereon. Under the Act collected in this manner are as follows:

J. E. Gardner		
E. R. Jackson		
Louis Hinde		
Clint Owen	50 00)
Zeb Owen	92 40)
W. L. Homsley	249 60)
Murphy & Cochran	350 00)
Scharbauer & Aycock	325 00	į

Net	6084	63
<u> </u>	~~~	

above statement, as is indicated therein, were collected only after suit was brought.. In December, 1896, I submitted to Hon. Geo. T. Jester, Lieutenant-Governor and at the time Acting Governor, four affidavits as to unlawful inclosures of University land, as provided in Art. 4300 of the Revised Statutes, and he thereupon directed the Attorney-General to institute suit to recover these lands, for the removal of fences thereon, and for damages for the use of the lands. These suits were instituted in the District Court of Travis county by the Attorney-

Some of the amounts included in the W. E. West and Fayette Tankersley. These suits, however, were never tried, but were settled before return day, the defendants paying the full amount due the University for use of the land; and agreeing to take a lease thereon from the Board of Regents, and an order was accordingly entered dismissing each case at the cost of defendant. In one case, being the suit against Fayette Tankers-ley, the defendant paid the amount due for past use of the land and an order was entered by consent directing the removal of any fencing that he might have thereon. The land included in Tankers-General, and were returnable to the ley's pasture was very promptly leased March term, 1897. The defendants in to other parties as soon as he complied the cases were E. R. Jackson, Zeb Owen, with this order and removed his fences.

SUMMARY.

Amounts received from leases in 1896, 1897, 1898	. \$78,408 . 6,084	05 63
Total	.\$84,492	68

the Board of Regents in 1895, upon the status, etc., of the University lands, I find the statement made that the total receipts from leases of University land from January, 1884, the date of the first lease, up to and including the year 1894, amounted to \$84,365.28. Comparing the receipts for the three years named with the receipts as shown by Prof. Batts' statement, it will be seen that they exceed by \$127.40 the total amount received during the eleven years from January, 1884, to December, 1894.

(4) Concessions to Lessees. All leases made by the Board of Regents have been for the term of ten years and at a lease rate of three cents per acre, with several exceptions. In lease No. 12, to the Western Union Beef Co., which covers 61,440

In the report of Hon. R. L. Batts to lease No. 39, to Johnson Bros., covering 119,040 acres in Ward, Winkler and Loving counties, which was made July 7, 1897, the rate of lease is 2½ cents per acre. The reason for this reduction in the lease rate is found in the great acreage included in both contracts, and in the fact that in the case of lease No. 12 the contract covered all the University land in that immediate section, and in the case of lease No. 39 it covered all of the University land in those counties that was situated north of the T. & P. railroad, except 22 sections in Block 19. which has been mentioned heretofore as being entirely without water and still unleased. As to the character of land covered by these contracts, in each instance a portion of it is very fine grazing land and could readily be made the subacres in Crane and Upton counties, which | ject of lease at three cents an acre, but was made September 1, 1896, and in the remainder, amounting in each case

to from 40 to 50 per cent. of the entire acreage, is exceedingly poor and undesirable, and has hardly any leasable value except in conjunction with the rest of the tract. Of the land covered by contract No. 12, so far as I have been able to ascertain from the records of the Land Office, less than 20 sections of the 96 had ever before been the subject of lease, and only one payment, the first, was ever made by the lessee. The University had received from this tract of land in eleven years approximately the sum of \$384.00, and by reducing the rate of lease, as has been done, the institution has received in the last three years \$5,147.20. As to the land covered by contract No. 39, perhaps 35 sections out of 188 had been at different times the subject of lease, but certainly not more than one thousand dollars had been received as rent from this land. Under lease No. 39, the institution has already received \$4,017.60. In all other contracts made by the Board the rate of lease is three cents, and all contracts have been made for the term of ten years except No. 51, to J. W. Henderson, and No. 50, to Thos. McGuire. These parties held University land under other contracts, Mr. Henderson under lease No. 35, made by the Board of Regents, and Mr. McGuire under lease No. 8472, made by the Commissioner of the General Land Office, and the new contracts, viz.: 50 and 51, were made for a term of years to expire when the holdings of the parties under the other contracts should terminate, so that their tenure might be even. In all other instances the term of the lease is ten years, except Nos. 10 and 28, which were for the term of one year, as has already been explained.

These are the only concessions that have been granted to lessees except in the matter of making payments under some of the contracts semi-annual instead of annual, as has already been explained.

Estimate as to Future Income. As has been hereinbefore stated, the aggregate amount of the payments annually due under lease contracts, now in effect and good standing, is \$40,400.4ô, and nearly all of these contracts have at least five years to run. In tact, the bulk of them will not expire until 1906 and thereafter, but one or two of the leases made by the Commissioner of the General Land Office expire in 1900. The average time is certainly more than five years. But taking this period as the average time, theoretically the institution should receive at least that amount for five years. It must, however, be of Regents, the lessee has in every in-

borne in mind that the cattle industry has been in a more prosperous condition during the past two years than probably ever before in the history of the State. Not only has the price of stock been steadily advancing since 1896, but the western portion of the State has been blessed with the most favorable seasons, and to assume that all payments under lease contracts will be made and that the gross amount will be collected each year, is, practically, to assume that present conditions will continue. The value of the leasehold is directly influenced, as a matter of course, by the conditions, natural and otherwise, that surround the cattle business. If the seasons are favorable and cattle bring good prices, the leaseholds are in demand and lease payments will be promptly made. But on the other hand, experience has shown that in periods of depression and drought an obligation under a contract of lease is probably the last to be met by a cattle man. An examination of the books of the Treasurer will show that prior to 1895 the per cent. of lease contracts under which a second annual payment was made by the lessee is extremely small, and it will further show that the amounts received for any particular year since the inception of the lease system, and up to 1896, will hardly exceed in any instance 60 per cent. of the annual payments due, and in many instances the receipts have been as low as 40 per cent. In other words, from 40 per cent. to 60 per cent. or the gross acreage leased has been delinquent each year. It is true that this condition of affairs existed under and was no doubt largely aggravated by the policy of resorting to the cumulating remedy by cancellation of the lease contract. Prior to 1887 it seems that suits were not infrequently instituted for the recovery of amounts due under lease contracts, but I do not believe that a single proceeding of this kind has been commenced since that time, with the exception of the four suits instituted in 1896 by Attorney-General Crane, as hereinbefore mentioned. The policy of the Land Office was to rely entirely upon the remedy by cancellation, and the apparent effect of this was to make the contract practically one determinable at the will of the lessee. This was no doubt responsible in many instances for the failure on the part of the lessee to make subsequent payments, and the resulting deficit. While this cumulative remedy by forfeiture and cancellation is incorporated in the contract of lease made by the Board

stance been given to understand that this remedy would only be resorted to as a dernier resort. In other words, the lessee has been impressed with the fact that it will be the policy of the Board to make the contract of lease mutually binding for the stated term of years, and that for the protection of the University the Board would probably exhaust all legal remedies that it might have against the lessee or his property, before declaring the contract cancelled and ineffective. To secure the performance of the contract on the part of the lessee, a first lien is taken "upon all of the property" of the lessee on the leased premises, which is practically the same lien that is created by the Legislature for the protection of public school and other public lands. The language in which this lien is reserved is probably broad enough to cover not only improvements on the rented premises, but also the live stock, provided the necessary proof can be made. And the contract further prescribes that it shall be put of record in the county in which the land is situated or to which it is attached for judicial purposes, but, practically, I doubt very seriously if this lien would afford the lessor protection to any further extent than the improvements, for the reason that so far as the live stock is concerned it will be necessary to show, of course, that they had been at some time upon the leased premises. This would be a very difficult matter to do where so large a body of land is leased, to so many different parties, and where, too, it is the practice of the lessee to trade and deal in live stock with such frequency. To have at all times the proof necessary to fix a lien upon the stock of all University lessees would practically require the services of an agent in each county in which University lands were situated. The lessee may be grazing a certain brand or stock of cattle upon certain of the University lands during one year, and may sell or dispose of that entire stock or herd, or remove it from the State, and upon the maturity of the next payment, to secure which the lessor had a lien upon these particular stock of cattle, there may be no stock at all upon the leased premises. Consequently, this lien can hardly be relied upon as security or protection. In-

deed, the only protection that the lessor has is found in the value of the leasehold itself. If conditions similar to those that have existed during the past two years and a half could always be counted upon, the income from the leases would undoubtedly be assured. But in a section so subject to drought and in a business where prices fluctuate so frequently and to such a degree as in the cattle business, it is almost impossible to speak with any degree of safety as to the future revenue. It cannot be regarded as assured at any time, and it would certainly not be safe to make obligations or incur expenses upon the theory that the amount annually due from this source will be collected.

Land Sales and Accounts with Interest Thereon. As to the present status of accounts for the sale of University land with amount of principal remaining on the land notes and the interest that is annually due thereon, I regret that under the circumstances I am unable to give this data as of the present Under the law, of course all accounts and all obligations for the unpaid purchase money are kept in the office of the State Treasurer, as are all accounts pertaining to the lease as well as to the sale of University land, and I have to refer to the books and records of that office for the information that you de-I have endeavored to obtain the necessary data from that office, and in addition thereto asked the same by letter of the Treasurer. His reply, under date of December 16th, which is attached hereto, will explain why it is impossible at the present time to cover this point correctly. In view of the fact stated by Mr. Wortham, any statement taken from the books now would be incorrect. However, I have a statement covering these points that is correct to December 1, 1897, and I incorporate that herein. In a great many matters it is, of course, correct to the present time, and indeed, it is only incorrect in the balance of principal and amount of annual interest shown.

Of the original donation of fifty only 36 tracts have ever been sold, and the sales for all of these have either been cancelled or forfeited, except the following:

Section.	Block.	County.	Purchaser.	Balance Principal.	Annual Interest.
14 19 1, 4, 16 1, 2, 11 1, 4, 15	5 38 11 11 11	Tom Green	C. W. Wells R. O. Haskins C. L. Denton J. E. Cardner J. H. Lindley	1,242 65 304 80	\$ 55 16 62 15 15 25 39 25 15 60
		<u> </u>	Total	\$ 3,555 98	\$ 188 41

Of the original donation of fifty leagues, nearly all has been sold, and a very large per cent. of that sold has been patented. There are a few tracts of the land comprising this grant that have never been the subject of sale, so far as the records disclose. I have hunted out these pieces by investigation of the files of the Land Office, and also of the accounts in the Treasurer's office, and the result obtained will be given hereafter.

Though the investigation is not complete, I think it can be depended upon as far as it goes. Some years ago Hon. Geo. W. Breckenridge had an abstract made of the lands included in this donation, which abstract has attached to it plats of the location made in each county under this grant, and besides contains a great deal of other valuable data touching the location and sale of these lands and the different conflicts which have arisen with regard to them. This data and information it would now be impossible to obtain, and in such investigation as I have made I have simply endeavored to supplement and bring this abstract down to date, but even this has been a difficult and tedious task, involving the examination and comparison of many files in the Land Office and accounts in the Treasurer's office. In many instances I found several files covering the same tract of land, and also several accounts for the sale of it on the Treasurer's books. The results of this investigation have been preserved in the form of an abstract which is intended to supplement the one that Mr. Breckenridge had prepared.

Besides the land that has never been sold, there are tracts that have been abandoned, relinquished, and tracts the sales of which have been declared forfeited and cancelled by the Commissioner of the General Land Office. These cancellations and forfeitures were declared prior to the time that the Act of 1895 went into effect. Forfeitures have been declared since that time, but these will be mentioned particularly hereafter. Of the accounts for the purchase of portions of this grant upon which the final payment has not yet been made, the majority are in good standing and all accrued interest has been paid. Some, however, grant.

are delinquent, and subject to forreiture. With regard to the latter, during the year 1896 their number was much greater than at present, but I have retrained from asking the Commissioner of the General Land Office to declare forfeitures, and have endeavored to get the purchasers to pay accrued interest and put the accounts in good standing, explaining to them, whenever opportunity offered, that in the event of a forfeiture they would not have a prior right to repurchase at a lower rate of interest, and perhaps a lower price, as is true in the case of common school land under the general Act of 1895. A great many purchasers have done so, and in this way the number of delinquent accounts has been reduced. I think it will be found that in nearly every instance the original purchasers are either dead and their heirs assert no title or claim to the land, or have abandoned the purchase, or transferred their inchoate right to parties who realize that their claim is very doubtful and are therefore timid about expending any more money on it. The plan pursued has been not to ask a forfeiture until I had become familiar with the facts of each case and satisfied myself that the parties in possession had no real equity in the premises under the prior purchase, and also inspected the land and ascertained that in the event of forfeiture, it could probably be sold for more than \$2.00 per acre, the price at which University lands have heretofore been sold. This plan, though naturally slow and tedious of execution, will probably save trouble in the future, and perhaps avoid casting cloud upon titles. Acting on this plan, certain forfeitures were asked and declared in cases of sales of land in Callahan and Shackleford counties, as will be mentioned more particularly hereafter, and in each instance the lands were resold to the party in possession and claiming to be assignee of the original purchaser, at a very much better price than it brought under the previous sale.

I give below a detailed statement, by counties, of the unpatented lands of this grant.

feiture for lands located in this county. Quarter section No. 99 in this county, was sold under the Act of 1887, to G. B. Joplin, and forfeited by the Commissioner of the General Land Office for nonpayment of interest 1893. Contract of sale has recently been made with A. Alpurchaser, by which he purchases this not yet been resold.

There are no accounts subject to for-tract at \$4.00 an acre, upon forty years time, five per cent. interest, one-fortieth of the principal paid down and one-for-tieth each succeeding year. The account for the sale of quarter section No. 130, J. G. Hightower, has been delineant and subject to forfeiture since 1892, and on April 13, 1897, the Commissioner of the General Land Office declared the same lender, who is assignee of the original forfeited at my request. This tract has

On April the 13, 1897, at my request, the Commissioner of the General Land Office declared the following forfeitures in sales of University land, viz.: S. onehalf of quarter section No. 88, sold to J. E. Beeson, under the Act of 1874, delinquent since 1884; E. one-half of quarter section No. 49, sold to W. R. Bledsoe, under the Act of 1874, delinquent since 1894: quarter section No. 91, sold to L. E. Ormand, under the Act of 1874, delinquent since 1885; quarter section No. 48. sold to C. C. Hightower, under the Act of 1883, delinquent since 1895; and quarter section No. 87, sold to Josephine Beeson, under the Act of 1874, delinquent since 1884, all situated in Shackleford county. The account for sale of quarter section No. 80, to J. T. Andrews,

prior to that, for failure to pay interest for the year 1884. One of the sales thus forfeited, that of the quarter section No. 48, to C. C. Hightower, has been reinstated, the claimant of the land, Mr. P. J. Blackstock, paying all accrued interest, making proper proof of occupancy. as required by the Act under which this purchase was made, and filing in the Land Office properly authenticated transfers showing that he is the assignee of Hightower, the original purchaser. reason for reinstating this sale is found in the fact that Mr. Blackstock, who is really the assignee of the original purchaser, had been improperly informed as to his rights, he having been advised that by permitting a forfeiture to be declared he would have a prior right to had been declared forfeited some time repurchase the land occupied by him at

a less price per acre and a lower rate of sion and claiming to be the assignees of interest. The account had been delin- the original purchasers. These sales quent only since 1895. Of the lands that were made upon forty years time, five reverted to the University by the other principal down and one-fortieth each sucforfeitures, all have been sold again, and ceeding year, to the following parties at in each instance to the parties in posses- the following prices:

per cent. interest, one-fortieth of the

Quarter section No. 80, G. E. Waters, \$4 per acre. Quarter section No. 91, Joe Dorsey, \$4 per acre. Quarter section No. 87, McHarg & Gates, \$5 per acre. East one-half quarter section No. 49, J. P. Bledsoe, \$4 per acre. South one-half quarter section No. 88, McHarg & Gates, \$5 per acre.

SUMMARY ACCOUNTS IN GOOD STANDING.

County.	Balance Principal. A	nnual Interest.

payments, and quite a number of partial payments of principal have been made, which, of course, renders the above summary incorrect as of this date. The balance of principal and the annual interest, as stated above, has been reduced by these payments, but for the reasons heretofore indicated, the amount of this reduction cannot just now be arrived at.

5,095.78 acres of this grant of fifty leagues are yet undisposed of. But the title to a good portion of this has failed by reason of conflicts with senior locations and for other reasons. Indeed, the title to practically all of it is in dispute. but some of the adverse claims are entirely without merit. I know this to be sity lands since February, 1896, viz.:

During the present year, several final true with regard to the unsold lands in this, McLennan county, and I am sure that an investigation of the facts on the ground will show that it is also true in other counties. However, it will require an investigation in each county in which these unsold lands are situated, to establish the superiority of the University's title, and in probably every instance an action will have to be brought to remove the cloud. But the quantity of land in-By the records of the Land Office, volved would certainly seem to be sufficient to justify the expense of the proceedings. If the title was clear, the land could no doubt be sold for at least \$5.00 an acre.

(7) Expenses. The following expenses have been incurred by the Board of Regents in the management of the Univer-

The item "Surveyor's fees" covers amounts paid to the surveyors of the several counties in which the University lands are situated, for information relative to the location of the same, and for running the lines thereof, where it was necessary to do so in order to determine who was in possession of the land and using same. It was necessary to have this done in the case of the Andrews county lands, and some of the lands in Crockett and Tom Green counties. Between one hundred and seventy-five and two hundred miles were run by the surveyors.

The item "Notary's fees" covers amounts paid to Mr. Geo. E. Shelley for taking the acknowledgment of the Chairman of the Board to the several contracts of lease.

The item "Expenses San Elizario Land" covers the expenses that have been incurred in the investigation of the University's title and in securing evidence in support of that title. It has involved several trips to El Paso, and trips to other places not in the State.

To the above expenses should be added the salary of your Land Agent from February, 1896, to November, 1898, amounting for that period to \$4,125.00.

I believe the above covers all matters upon which you desired information.

Very respectfully,

TOM J. LEE, Special Agent.

Senator Linn moved that tomorrow at 11 a. m. be fixed as the hour for the Senate to go into executive session on the Governor's appointments.

So ordered.

On motion of Senator Greer, the Senate adjourned to 10 a.m. tomorrow.

TWENTY-FIRST DAY.

Senate Chamber,

Austin, Texas, Tuesday, Feb. 7, 1899. Senate met pursuant to adjournment. Lieutenant-Governor Browning in the

chair.

Roll called. Quorum present, the following Senators answering to their names:

Atlee. Morriss. Burns. Neal. Davidson. Odell. Potter. Dibrell. Greer. Ross. Grinnan. Sebastian. James. Stafford. Johnson. Stone. Kerr. Terrell. Linn. Turney. Lloyd. Wayland. McGee. Yantis.

Absent—Excused.

Goss. Gough. Hanger. Lewis.

Miller. Patterson. Yett.

Prayer by the Chaplain, Rev. Dr. Den-

Pending the reading of the Journal of yesterday,

On motion of Senator McGee, the same was dispensed with.

EXCUSED.

On motion of Senator Morriss, Senator Potter was excused for non-attendance on yesterday on account of important business.

On motion of Senator Neal, Senator Stone was excused for non-attendance on yesterday on account of important busi-

On motion of Senator Turney, Senator Kerr was excused for today on account of sickness.

PETITIONS AND MEMORIALS.

By Senator Potter:

Memorial of citizens, residents upon block No. 97 of State lands, relating to homestead rights in school lands.

Read, and referred to Committee on

Public Lands.

By Senator Sebastian:

Petition from citizens of Scurry county owning public lands patented by the State, and entitled to patents by reason of having lived upon the same, etc.

Read, and referred to Committee on

Public Lands.

COMMITTEE REPORTS.

Committee Room. Austin, Texas, Feb. 6, 1899.

Hon. Jas. N. Browning, President of the Senate.

SIR: Your Committee on Finance, to whom was referred

Senate Joint Resolution No. 3, establishing a commission to be known as "The Tax Commission," whose duty it shall be to formulate measures looking to a fair and equitable imposition of taxes and to their more certain and economical collection, and also to a better and safer system for the disbursement of the public money, and to report the same to the Legislature; and making an appropriation for the expenses of such commis-

Have had the same under consideration, and I am instructed to report the same back to the Senate with the recommendation that it do pass.

DIBRELL, Chairman.

Committee Room, Austin, Texas, Feb. 1, 1899.

Hon. Jas. N. Browning, President of the Senate.

Your Committee on Engrossed Bills have carefully examined and compared

Senate bill No. 67, being "An Act to amend Article 5058, of the Revised Civil Statutes of 1895, of the State of Texas, as passed in 1891, relating to the duties of revenue agents,

And find the same correctly engrossed. JAMES, Chairman.

> Committee Room, Austin, Texas, Feb. 3, 1899.

Hon. Jas. N. Browning, President of the Senate.

Your Committee on Engrossed SIR: Bills have carefully examined and compared

Senate bill No. 38, being "An Act to punish all officers of this State who are charged by law with the enforcement of the criminal laws of Texas, who consent or agree to accept or receive any plea of guilty from any person charged with crime, or any person who is or may be engaged in any occupation, calling, profession or business in violation of the criminal laws of Texas, or who consent
